

Dream in Green Awards Ceremony for 2014-2015

Dream in Green’s mission is to respond to climate change by developing and implementing educational programs that empower people to help solve this critical issue. We promote environmentally sustainable behaviors, including energy and water conservation, waste reduction and recycling. We build partnerships in the local community for the purpose of reducing the environmental footprint of schools, households, local governments, and businesses. Our programs emphasize education and behavior change.
